SUMMARY

I'm an experienced software engineer who constantly seeks out innovative solutions to everyday problems. In my 7 years in this industry, I've honed my analytical thinking and collaboration skills, and I love working with a team.

I'm quick learner and I can worked on any programming language or programming related projects as long as I have a proper documentation.

I have complete knowledge of object oriented programming as well.

I've also had the opportunity to serve as the software engineer lead for 3 projects.

Professional Services

- Writing technical documentation
- Working with data scientists and analysts to improve software

Laravel, ngrok, gitwork , Python, MUI

S-PRO

May 2017– Dec 2017

Project Description:

Virtue Media was started as a result of seeing a need for better ideas for marketing. Ideas that could propel businesses big and small to the forefront of the global market. With so many things changing in the industry, Virtue Media set out to be the do-ers and the change-markets of digital marketing.

They were having a website which was quite Old-fashioned as compared to a standard digital marketing company website. The need was to update the website in a very organized and interactive way

Responsibility: Front – End Developer

- Implementing client-side applications with React, Next.js, and Redux
- Developing responsive user interfaces with Twitter Bootstrap and SCSS
- Developing the event-driven client-side applications using WebSockets
- Creating complex diagrams and tables for advanced analytics
